CONTENTS

Volume 30, Issue Nos. 1–8 (1990)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

A Use of Linear Programming for the Analysis of Plane Strain Rigid–Plastic Flow: M. J. Pavier 1

Gauss Quadrature Rules for Finite Part Integrals: G. Tsamasphyros and G. Dimou . . 13

Transient Finite Element Computations on 65536 Processors: The Connection Machine: C. Farhat, N. Sobh and K. C. Park 27

Finite Element Solution of Two-dimensional Inverse Elastic Problems Using Spatial Smoothing: D. S. Schnur and N. Zabaras 57

Dynamics of General Flexible Multibody Systems: R. P. S. Han and Z. C. Zhao . . . 77

A New Approach to Boundary Modelling for Finite Difference Applications in Solid Mechanics: J. O. Dow, M. S. Jones and S. A. Harwood 99

Generalized Axisymmetric Elastodynamic Analysis by Boundary Element Method: H.-C. Wang and P. K. Banerjee 115

Finite Element/Newton Method for the Analysis of Czochralski Crystal Growth with Diffuse-grey Radiative Heat Transfer: D. E. Bornside, T. A. Kinney, R. A. Brown and G. Kim 133

A General Procedure for the Direct Computation of Turning and Bifurcation Points: P. Wriggers and J. C. Simo 155

Analysis of Locking and Stress Oscillations in a General Curved Beam Element: G. Prathap and B. P. Naganarayana 177

CONFERENCE DIARY 201

Issue No. 2

Natural Approach for Geometric Non-Linear Analysis of Thin-walled Frames: A. Conci and M. Gattass 207

A Hybrid Strain Finite Element for Plates and Shells: V. L. Bergmann and S. Mukherjee 233

Indexed or abstracted by 'Abstract Jnl. in Earthquake Engineering', 'Applied Mechanics Review', 'Boundary Element Abstracts', 'Cambridge Scientific Abstracts', 'CITIS-Civil Engineering Abstracts', 'Compumath Citation Index', 'Current Contents', 'Engineering Index Inc', 'Eng. Societies Library', 'BHRA Fluid Engineering Centre', 'Geodex', 'Geotechnical Abstracts', 'Indian Society of Earthquake Technology', 'INSPEC', 'International Petroleum Abstracts', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Engineering Analysis Software', 'Science Citation Index', 'SCISEARCH Database', 'Shock and Vibration Digest', 'Zentrablatt fur Mathematik'.

Power Series Expansions of Dynamic Stiffness Matrices for Tapered Bars and Shafts: C. C. Spyrakos and C. I. Chen 259

Iterated θ- Method for Hyperbolic Equations: P. J. Van der Houwen and B. P. Sommeijer 271

A Finite Element Spectral Method with Application to the Thermoelastic Analysis of Space Structures: O. Rand and D. Givoli 291

Numerical Analysis of Three-time-level Finite Difference Schemes for Unsteady Diffusion–Convection Problems: A. Rigal 307

A Petrov–Galerkin/Modified Operator Formulation for Convection–Diffusion Problems: P. A. B. De Sampaio 331

A Poisson Equation Formulation for Pressure Calculations in Penalty Finite Element Models for Viscous Incompressible Flows: J. L. Sohn and J. C. Heinrich 349

An Exact Element Method: M. Eisenberger 363

Finite Element Modelling of Crack Tip Behaviour in Viscoelastic Materials. Part I: Linear Behaviour: P. Krishnaswamy, M. E. Tuttle, A. F. Emery and J. Ahmad 371

BOOKS RECEIVED 389

CONFERENCE DIARY 391

Issue No. 3

Non-diffusive $N+2$ Degree Petrov–Galerkin Methods for Two-dimensional Transient Transport Computations: M. E. Cantekin and J. J. Westerink 397

A High-order Triangular Plate Bending Element Revisited: S. Dasgupta and D. Sengupta 419

Consistency Aspects of Out-of-plane Bending, Torsion and Shear in a Quadratic Curved Beam Element: B. P. Naganarayana and G. Prathap 431

A Robust Quadrilateral Membrane Finite Element with Drilling Degrees of Freedom: A. Ibrahimbegovic, R. L. Taylor and E. L. Wilson 445

An Implementation of the *hp*-Version of the Finite Element for Reissner–Mindlin Plate Problems: S. Holzer, E. Rank and H. Werner 459

Towards Adaptive Mesh Refinement: Application of New Rectangular Hybrid Finite Elements in 2D Elasticity Problems: B. Perry, P. Bar-Yoseph and G. Rosenhouse . . 473

A Unified Numerical Integration Formula for the Perfectly Plastic von Mises Model: W. Wu 491

Boundary Element Method Analysis of Stationary Thermoelasticity Problems in Non-homogeneous Media: J. Sladek, V. Sladek and I. Markechova 505

Biharmonic Analysis of Rectilinear Plates by the Boundary Element Method: C. V. Camp and G. S. Gipson 517

Finite Elements with Displacement Interpolated Embedded Localization Lines Insensitive to Mesh Size and Distortions: E. N. Dvorkin, A. M. Cuitiño and G. Gioia 541

BOOK REVIEWS 565

ANNOUNCEMENTS 569

CONFERENCE DIARY 573

Issue No. 4

PREFACE iii

Thermo-mechanical Finite Element Model of Casting Systems: R. Song, G. Dhatt and A. B. Cheikh 579

The Graphical Representation of FE Temperature Field Calculation Results: J. F. Stelzer 601

Monte Carlo Simulation of Indoor Radiant Environment: T. Omori, H. Taniguchi and K. Kudo. 615

Mathematical Modelling of LPG Tanks Subjected to Full and Partial Fire Engulfment: G. V. Hadjisophocleous, A. C. M. Sousa and J. E. S. Venart 629

F.E.M. in Steady MHD Duct Flow Problems: R. Scandiuzzi and B. A. Schrefler 647

Quasi-Newton Iterative Strategies Applied to the Heat Diffusion Equation: A. Soria and P. Pegon 661

The Numerical Simulation of Heat Conduction in Irregularly-shaped Materials of Thermally-dependent Properties: W. C. Schreiber 679

A Conservative Algorithm for Multidimensional Conduction Phase Change: G. Comini, S. Del Giudice and O. Saro 697

A Stable Alternating Direction Method for Simulating Multi-dimensional Solidification: F. Mampaey 711

Beyond First-order Upwinding: The Ultra-sharp Alternative for Non-oscillatory Steady-state Simulation of Convection: B. P. Leonard and S. Mokhtari 729

Computer Simulation of Salami Drying: L. Imre and T. Környey 767

Multi-grid Solution of Two Coupled Stefan Equations Arising in Induction Heating of Large Steel Slabs: R. H. W. Hoppe and R. Kornhuber 779

Recent Advances, Trends and New Perspectives via Enthalphy-based Finite Element Formulations for Applications to Solidification Problems: K. K. Tamma and R. R. Namburu 803

A Finite Element Simulation of Metal Flow in Moulds: G. Dhatt, D. M. Gao and A. B. Cheikh 821

A Layered Composite Shell Element for Elastic and Thermoelastic Stress and Stability Analysis at Large Deformations: K. Dorninger and F. G. Rammerstorfer 833

Radiative Ignition of Fabrics and Assemblies: Experiments and Modelling; P. Durbetaki and P. X. Tran 859

Fixed Grid Techniques for Phase Change Problems: A Review: V. R. Voller, C. R. Swaminathan and B. G. Thomas 875

A Numerical Study of Three-dimensional Natural Convection During Freezing of Water: G. H. Yeoh, M. Behnia, G. De Vahl Davis and E. Leonardi 899

ANNOUNCEMENTS 915

Issue No. 5

Optimal Cross-sectional Shapes for MHD Channel Flows: R. A. Meric 919

A Fully Automatic Three-dimensional Mesh Generator for Complex Geometries: E. K. Buratynski 931

The Dual Reciprocity Boundary Element Method for Spontaneous Ignition: P. W. Partridge and L. C. Wrobel. 953

Approximate Predictions of Ice Accretion Along Conductors of Finite Torsional Stiffness and Control of Rotation using Counterweights: P. L. I. Skelton and G. Poots . . . 965

Specifications of Boundary Conditions for Reissner/Mindlin Plate Bending Finite Elements: B. Haggblad and K. J. Bathe 981

Rates of Change of Close-loop Eigenvalues and Eigenvectors of Actively Controlled Structures: T. S. Pan, S. S. Rao and V. B. Venkayya 1013

A Triangular Element Based on Reissner–Mindlin Plate Theory: P. Papadopoulos and R. L. Taylor 1029

Hermitian Cubic Boundary Elements for Two-dimensional Potential Problems: J. F. Durodola and R. T. Fenner. 1051

A Mixed-penalty Finite Element Formulation of the Linear Biphasic Theory for Soft Tissues: R. L. Spilker and T. A. Maxian 1063

Technical Note: Computational Enhancement of an Unsymmetric Block Lanczos Algorithm: H. M. Kim and R. R. Craig, Jr. 1083

CONFERENCE DIARY 1091

ANNOUNCEMENTS 1097

Issue No. 6

A Hyperelastic-based Large Strain Elasto-plastic Constitutive Formulation with Combined Isotropic–Kinematic Hardening using the Logarithmic Stress and Strain Measures: A. L. Eterovic and K.-J. Bathe 1099

Three-dimensional Non-linear Fluid–Structure Interaction Problems: Formulation by the Finite and Infinite Element Method: Y. Q. Feng and J. P. Quevat 1115

Finite Difference Scheme for Wave Transmission in a Rubble Mound Breakwater: P. Hölscher and F. B. J. Barends 1129

Application of the Trefftz Method in Plane Elasticity Problems: W. G. Jin, Y. K. Cheung and O. C. Zienkiewicz 1147

An Elliptical Growth Model of Forest Fire Fronts and its Numerical Solution: G. D. Richards 1163

Viscous Flow and Transport with Moving Free and Reactive Surfaces: P. Murray and G. F. Carey 1181

A Numerical Model for Immiscible Two-phase Fluid Flow in a Porous Medium and its Time Domain Solution: X. Li, O. C. Zienkiewicz and Y. M. Xie 1195

Minimax Multiobjective Optimization in Structural Design: C. H. Tseng and T. W. Lu 1213

CONFERENCE DIARY 1229

Issue No. 7

ERRATA ii

Effect of the Coupling Between Stretching and Bending in the Large Displacement Analysis of Plates: B. Chang, D. C. Chen and A. A. Shabana 1233

Curved Mindlin Beam and Axi-Symmetric Shell Elements—A New Approach: R. A. Day and D. M. Potts 1263

Modelling the Pressure Die Casting Process with the Boundary Element Method: Steady State Approximation: K. Davey and S. Hinduja 1275

Benchmark Problems and Testing of a Finite Element Code for Solidification in Investment Castings: U. Chandra 1301

Superconvergence Recovery Technique and *a Posteriori* Error Estimators: J. Z. Zhu and O. C. Zienkiewicz 1321

Three-dimensional Finite Element Contact Algorithm for Metal Forming: M. J. M. Barata Marques and P. A. F. Martins 1341

BOOK REVIEWS 1355

BOOKS RECEIVED 1358

ANNOUNCEMENTS 1360

CONFERENCE DIARY 1363

Issue No. 8

PREFACE 1367

Finite Element Analysis of Mixing Phenomena in Tangential Twin-screw Extruders for Non-Newtonian Fluids: T. Sastrohartono and T. H. Kwon 1369

Finite Element Procedures for Strain Estimations of Sheet Metal Forming Parts: Y. Q. Guo, J. L. Batoz, J. M. Detraux and P. Duroux 1385

Bulge Predictions in Steady State Bar Rolling Processes: Y.-S. Lee, P. R. Dawson and T. B. Dewhurst 1403

Application of the Finite Element Method to the Stimulation of Sheet Forming Processes: Comparison of Calculations and Experiments: P. Keck, M. Wilhelm and K. Lange . . 1415

Finite Element Stimulation of Three-dimensional Deformation in Shape Rolling: K. Mori and K. Osakada 1431

Progress in Mixed Eulerian–Lagrangian Finite Element Simulation of Forming Processes: J. Huetink, P. T. Vreede and J. Van Der Lugt 1441

A Study of Heat Transfer During Flat Rolling: M. Pietrzyk and J. G. Lenard 1459

Compatible Description of Tool Surfaces and FEM Meshes for Analysing Sheet Forming Operations: Y. T. Keum, E. Nakamachi, R. H. Wagoner and J. K. Lee 1471

An Automatic Remeshing Technique for Finite Element Stimulation of Forming Processes: A. Habraken and S. Cescotto. 1503

Adaptive FEM Computation of Forming Processes—Application to Porous and Non-porous Materials: O. C. Zienkiewicz, G. C. Huang and Y. C. Liu 1527

An Adaptive Remeshing Technique for Non-Newtonian Fluid Flow: H. H. Dannelongue and P. A. Tanguy 1555

Numerical Analysis of Polymer Injection Moulding Process using Finite Element Method with Marker Particles: I. Matsuhiro, T. Shiojima, Y. Shimazaki and H. Daiguji . . . 1569

Finite Element Analysis of Sheet Metal Forming Problems using a Selective Viscous Bending/Membrane Formulation: E. Oñate and C. A. De Saracibar 1577

A Numerical Analysis of Wrinkle Formation Tendencies in Sheet Metals: K. W. Neale and P. Tugcu 1595

Computer Aided Simulation of Metal Flows in Non-axisymmetric Extrusions Through Bridge Dies: M. Kiuchi and M. Hoshino 1609

A Flow Formulation for Rate Equilibrium Equations: E. G. Thompson and S.-W. Yu . . 1619

Simulation of the Processing of Thermoset Polymers: S.-F. Shen 1633

Finite Element Simulation of Metal Powder Forming: J.-L. Chenot, F. Bay and L. Fourment 1649

Elastic–Viscoplastic Implicit Formulation for Finite Element Simulation of Complex Sheet Forming Processes: M. J. Saran and A. Samuelsson 1675

On Numerical Modelling of Hot Rolling of Metals: J. J. M. Too. 1699

Numerical Simulation of the Superplastic Forming of Thin Sheet Components using the Finite Element Method: J. Bonet, R. D. Wood and A. H. S. Wargadipura 1719

Finite Element Analysis of Sheet Forming Processes: N. Rebelo, J. C. Nagtegaal and H. D. Hibbitt 1739

AUTHOR INDEX 1759
